

Adding a new Keyfob

- (1) Press the white operating button on the wall box for about 5 seconds and let it go when the red LED indicator (on the wall box) goes out. The red LED will flash once to confirm "Add Keyfob Mode".
- (2) Take the new key fob to be added and press the required button on the keyfob once. repeat this if you are adding multiple keyfobs
- (3) The red LED indicator on the wall box should flash once when you add each keyfob
- (4) After the key fob[s] has been added wait for 1 minute and when the red LED indicator switches back on the door is ready for normal use.
- (5) If you make a mistake switch of the power supply for about 10 seconds And start again.
