Eco Friendly & Weather Proof

As a responsible manufacturer, we spend a lot of time ensuring that we fulfill our obligations to creating a more sustainable future.

Green doors – now available in every colour

From day one we chose to use a calcium zinc-based compound in the extrusion of the door frame (which we make in different lengths to avoid waste) because it's much kinder to the planet than lead-based additives.

The door's inner rigid foam system is completely, utterly, one hundred percent CFC-free.
